

High Performance Clarifiers

Features:

Easy Operation

- ✓ The design is robust and carries simple Installation.
- ✓ The Drive is simplified by the planetary gearbox and inverter.

Maximized Productivity

- ✓ The sugar losses are reduced.
- ✓ The juice turbidity is low, and its output coloration is reduced.
- ✓ The consumption of flocculent is low and the mud is of high density.

Easy Maintenance

- ✓ The maintenance requirements are reduced, and the mud removal and the flocculent dosage are automated.
- ✓ The safety is optimized.

Our High Performance Clarifiers separates mud from the clear juice in the cane clarification process.

Because of tray-less design, our short retention time clarifiers, allows reduced retention times and reduced sugar losses making it ideal to replace the multi-tray clarifiers.
